# Job Role : Project Manager

**Job Location: Dubai,U.A.E**

We are seeking an experienced Project Manager to lead and coordinate end-to-end project delivery in manufacturing automation. The role holder will be responsible for managing multiple stakeholders, including OEMs, partners, and global clients, ensuring successful execution of high-value projects.

The ideal candidate has a proven track record of delivering multi-million-dollar automation projects for global clients and is comfortable managing complex engagements across international teams. This role will require regular travel to client sites in the Middle East to oversee implementation, resolve challenges, and ensure seamless execution.

**Key Responsibilities**

- Lead end-to-end project execution, from planning to final delivery, ensuring adherence to scope, timeline, and budget.
- Serve as the primary point of contact between OEMs, technology partners, and clients.
- Develop and maintain strong relationships with global clients, ensuring alignment on project goals and expectations.
- Drive stakeholder communication, ensuring seamless coordination between engineering, operations, and commercial teams.
- Identify and mitigate project risks proactively to ensure smooth implementation.
- Oversee on-site activities, including system integration, commissioning, and client acceptance testing.
- Ensure compliance with contractual obligations, industry standards, and regional regulations.
- Manage project financials, including budgeting, forecasting, and cost control.
- Provide leadership to project teams, ensuring collaboration and high performance.
- Report project status, progress, and key milestones to senior management and stakeholders.

**Key Requirements**

- Proven experience managing large-scale automation projects in the manufacturing sector.
- Strong background in handling multi-million-dollar projects with global clients.
- Demonstrated ability to manage complex stakeholder relationships across different geographies.
- Experience working with OEMs, system integrators, and automation technology providers.
- Willingness to travel regularly to client sites in the Middle East.
- Strong commercial acumen with the ability to manage budgets, contracts, and negotiations.
- Excellent problem-solving and risk management skills.
- Strong leadership, communication, and stakeholder management capabilities.
- Technical understanding of automation systems, industrial robotics, or control systems is a plus.

**Preferred Qualifications**

- Degree in Engineering, Automation, Manufacturing, or a related field.
- PMP, PRINCE2, or other project management certification is highly desirable.
- Experience with MES, SCADA, or Industrial IoT solutions is a plus.

This is a high-impact role offering the opportunity to work with cutting-edge automation solutions for global clients. If you thrive in a dynamic environment and have a passion for driving large-scale manufacturing transformation, we'd love to hear from you!

**How to Apply**: Please submit your CV and a brief cover letter outlining your experience with global automation projects and stakeholder management at **info@xellr.com**
